METHODOLOGY IN ARCHITECTURAL DESIGN

JOHANNESBURG
24 - 25 JANUARY 2019

ABOUT THE WORKSHOP

The act of designing in architecture is a complex process. Many designers, when probed for reasons to explain their actions, are either unable to answer questions, or provide explanations that are not true descriptions of their actions. Frequently the designer will answer that his or her reason for making a particular design decision is based on 'feeling' or 'intuition.' Under this model the design process assumes a 'mystical' aura. Architectural designers can create, yet are unable to say how they do so. Often that which can be explicitly discussed by the designer is the least significant part of his or her design process. It is unlikely that designers are 'channeling' information from cosmic sources. Rather, they are working with knowledge that is largely tacit.

This workshop will contribute to the continuing development of the architectural professional by providing further mobility and transportability within the field of applying and understanding methodology in architectural design.

The workshop is designed for those registered in other categories than professional architects, but professional architects are welcome to attend and contribute to this interactive workshop.

DURATION:

The workshop is a 2-day workshop that will start at 08:00 and end at approximately 15:00 on each day.

CPD:

The workshop is validated as an interactive Category 1 workshop and SACAP registered attendees will earn 3 credits

HAND-OUTS:

Participants will be provided with a flash drive containing the presentation

PRESENTER:

Frans Dekker is the current Director: Executive President of SAIAT and since 2008 has been actively involved in presenting CPD workshops for SAIAT.

He also represents SAIAT on several Technical Committees at the SABS including TC060 (SANS10400), TC1098 (SANS2001) and TC059 (Energy Efficiency) and actively participate in several Subcommittees and Workgroups of the SABS.
